Summary

I count myself as a hardworking person. To pursue a challenging career in a competitive world. I specialize in pixel-perfect responsive design.

Experience

Smith It

Senior Software Develope

March 2024 - Present

Sylhet

Led the development of scalable web applications using Php and Mysql, improving performance by 25%. Collaborated with cross-functional teams to define, design, and ship new features. Implemented robust API integrations and managed database schemas for critical projects. Mentored junior developers and conducted code reviews to ensure high code quality.

Smith It

Junior Web Developer

December 2022 - March 2024

Sylhet

Assisted in the development and maintenance of the company's flagship web application. Developed responsive user interfaces for various client websites using HTML, CSS, and JavaScript. Gained hands-on experience with back-end technologies including Php and Mysql. Participated in daily stand-ups and contributed to agile development sprints. Troubleshooted and resolved bugs, improving application stability.

Education

Metropolitan University

January 2017 - June 2021

B.sc in Computer Science Enginerring

Projects

Laravel -vue-Pos

<https://laravel-vue-pos.sourovdev.space/>

A full-stack Point of Sale (POS) system built with Laravel 12, featuring vue3, inertia js Bootstrap, and MySQL for robust product, sales, and customer management.

User-Role Management App

<http://rolemanagement.sourovdev.space/login>

This Laravel 12 dashboard, built with HTML5, CSS3, and JavaScript, and powered by MySQL, uses Laravel Breeze for scaffolding. Its key feature is robust role-based access control, ensuring specific users only access relevant features based on their assigned roles, thereby enhancing security and usability. The UI is clean, intuitive, and includes a dashboard overview and detailed "Recent Orders" table for clear data presentation.

FoodMenu Bd

<https://www.foodmenubd.com/>

Food Menu BD (<https://www.foodmenubd.com/>) is one of the key products from my office where I contributed to the **backend development**, focusing

mainly on **PHP** and **MySQL**. I was involved in building and optimizing core features that support restaurant listings, dynamic menus, and user interaction functionalities.

HisabAna

HisabAna is a POS software developed by **Smith IT**, where I contributed to the backend development. The project was built using **PHP** and **MySQL**. Due to confidentiality agreements, the live link or detailed information cannot be shared.
